Organised by Department of Botany, J.N. College

Date: 22nd March, 2021

Resource Person:

Dr Tapan Dutta, Principal, J.N. College, Boko, Assam. Ph. No. 9435110841

Participants : All faculty members of the college, students and alumni of the Department of Botany

A popular talk was organised by Department of Botany on the occasion of World water day on 22nd March, 2021. The theme of the talk was “Catch the rain: where it falls, when it falls”. Dr Tapan Dutta, Principal, J.N. College, Boko, Assam has participated as the resource person. The resource person has described about the present day scarcity of drinking water as well as useable water and its future aspects. He also elaborates how the conservation of rain water will resolve this problem to a great extent. In his presentation, he has given examples where in some places of desert region of our country resolve water scarcity by conserving rain water during the rainy season and use it rest of the year. All the faculty members, students and departmental alumni were benefited from the popular talk.
