

Evaluative Report

The Department of Education tries to evaluate the course outcome of the students continuously through sessional test, class test, group discussion, brain storming session and also organize seminars, workshop, popular talks from time to time and analyse the achievement of the students.

The department also identifies both slow learners and advanced learners and take individual care to fulfill their needs and aspirations.

The department also form groups of students under each faculty and carry out mentoring activities for their overall development under his/her guidance.

After completion of the course it has been found that 90% to 100% students complete their program successfully. Even though a good number of students successfully complete their degree course, however only around 5% students are able to progress to higher education due to their poor socio- economic condition. It was also seen that almost 50% students get placement in different government and private sectors as well as entrepreneurship.

One notable feature of the course curriculum is that due to the introduction of Skill enhancement subjects, namely, Public Speaking Skill and Writing Bio-data and facing an Interview, the students are able to gain insightful and comprehensive idea about the job placement requirements.
